

AMENDMENTS TO THE SPECIFICATION

On page 13, lines 10 through 24, please amend the paragraph beginning on line 22 and ending on line 24 of the specification as follows:

According to a constructive option of the present invention, illustrated in figure 4, each of the first, second and third fixed bases A, B, C presents a respective auxiliary control unit 3 defining a respective other communication device, as described below, which calculates said time differences mentioned above. In this construction, each control unit 3 reads a respective precision clock 4, commands and coordinates the output of information to a communication means and memorizes, compares and processes the data received by the respective receivers 2 of the corresponding fixed base ~~bases~~ bases A, B, C.
